How exactly are my SourceAudio metadata fields mapped to the DSP data fields?

Here's a complete breakdown of the mapping with the DSP field on the left and the SourceAudio metadata field that the data is pulled from on the right.

Song Title: Title

Album Title: Album

Artist: Artist (Please list only one artist.)

Release Date: Release Date

Label: Label

Primary genre: Your primary mapping selection in the DSP panel for the track's Genre metadata value
(NOTE: Please only list one genre in the Genre metadata field.)

Secondary genres: Your secondary mapping selection in the DSP panel for the track's Genre metadata value

C line and P line: Artist and each Writer listed on the track

C line and P line year: The year in the Release Date

ISRC: ISRC

Artwork is pulled from the album artwork as displayed on the album listing on your SourceAudio catalog manager site.
